

# For graduate, business and law school. For your future.

## Thinking about returning to school?

### It's a smart move

Getting an advanced degree can create many opportunities. In fact, recent data from the U.S. Bureau of Labor Statistics illustrates how education pays in higher earnings and lower unemployment rates. So, now might be just the right time to consider a graduate degree, including business and law.

Earnings and unemployment rates by educational attainment, 2020

Note: Data are for persons age 25 and over. Earnings are for full-time wage and salary workers. Source: U.S. Bureau of Labor Statistics, Current Population Survey.

## How to get started

If it has been a while since you have been in school, that's okay. Here are some tips to help you get started.

First, you will want to think about the type of school and program that will be the best fit for you.

You will also want to take the *GRE*<sup>®</sup> General Test — it is the test that graduate, business and law schools around the world use as part of their application process. Plus, the *GRE*<sup>®</sup> Program has a variety of **free resources to help you get ready!**

Here are some **quick facts** about the GRE General Test:

- The content of the test closely reflects the kind of thinking you will do in graduate school.
- The test takes about 3 hours and 45 minutes (plus timed breaks) and you will take it on computer at an official test center, or the test can be taken at home.
- The test covers:

**Verbal Reasoning** — Measures your ability to analyze and evaluate written material and synthesize information obtained from it, analyze relationships among component parts of sentences and recognize relationships among words and concepts.

**Quantitative Reasoning** — Measures problem-solving ability, focusing on basic concepts of arithmetic, algebra, geometry and data analysis.

**Analytical Writing** — Measures critical thinking and analytical writing skills, specifically your ability to articulate and support complex ideas clearly and effectively.

## Refresh your skills

If it has been a while since you have encountered questions on these topics, the GRE Program has a number of free test preparation materials that can help you refresh your skills. Two of the documents you might find useful are:

### **GRE Math Review**

This 100-page math refresher includes definitions, properties, examples and a set of exercises with answers at the end of each section to assist you in preparing for the GRE General Test.

### **GRE Math Conventions**

Mathematical notations, symbols, terminology and guidelines are included for interpreting information in the GRE General Test.

Next, try a real practice test — you will find two of them in the free **POWERPREP®** Online. The practice tests simulate the actual computer-delivered GRE General Test, including the test-taker friendly design features you will encounter on test day, like moving back and forth between questions, changing answers within a section and the on-screen calculator.

You will find these free test prep tools, plus official practice books and more — including the **POWERPREP PLUS®** Online with never-before-published real test questions — at [ets.org/gre/prepare](https://ets.org/gre/prepare).

## Do Your Best on the Test

If you are still not sure about taking the next step, keep in mind that the GRE General Test can help you do your best.

Wake up on test day feeling ready. If you do your best, that's terrific! You can send your scores to prospective schools right away. But, with the **ScoreSelect®** option, available ONLY with GRE tests, you do not have to. You can **send only your best set of scores!** That's right. If you feel you want to try again, you can retake the test and send the scores you feel show your personal best. Just *knowing* you have that option will help you feel more confident on test day.

Learn more about this at [ets.org/gre/scoreselect](https://ets.org/gre/scoreselect).

And you may also find it good to know that the GRE General Test has some friendly features that let you use more of your own personal test-taking strategies. For example, the GRE General Test is the only admissions test for graduate, business or law school that lets you skip questions within a section, go back and change answers, and have control to tackle the questions, within a section, that you want to answer first.

**Taking the GRE General Test to pursue a graduate degree, including business and law, is a smart move for your future.**
